DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- Group I. Claims 1, 3 13, 37, 39 4, and 49 52 drawn to sorting or filtering, classified in class 707, subclass 7.
- Group II. Claims 14 16, 18 34, 36 -, 53 56 drawn to application of database, classified in class 707, subclass 104.1.
- Group III. Claims 57 66 drawn to database maintenance, classified in class 707, subclass 200.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions listed as Group I, Group II, and Group III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention has separate utility as follows:

Group I has separate utility such as collaborative filtering techniques on temporal history of previously viewed information.

Group II has separate utility such as a multimedia system that stores information locally received from program delivery system for view at a local system. See MPEP § 806.05(d).

Group III has separate utility such as a system that facilitates local storage space utilization. See MPEP § 806.05(d).

Art Unit: 2162

Ų,

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and Group III, search required for Group II is not required for Group I and Group III and search required for Group III is not required for Group I and Group II, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

During telephone conversation with Himanshu S. Amin, Attorney for the Applicant, Registration Number 40,894 on February 17, 2005 a provisional election was made without traverse to prosecute the invention of Group I, claims 1, 3 – 13, 37, 39 – 4, and 49 - 52. Applicant in reply to this Office action must make affirmation of this election. Claims 14 – 16, 18 – 34, 36 -, 53 - 6 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

19

Allowable Subject Matter

- 3. Claims 1, 37 and 47 are allowed over the prior art of record.
- 4. The following is an examiner's statement of reasons for allowance:

The prior art of record, either singularly or in combination, fail to anticipate or render obvious the recited feature "an inference system trained by the log selections of previously viewed information and that assigns values to selections in a recommendation list based on the previously viewed information, the inference systems employs collaborative filtering techniques on a temporal history of the previously viewed information to assign values to selections in the recommendation list from higher probability to a lower probability that a user of the system would prefer to view information corresponding to an available selection", as recited in the independent claims.

The closest prior art of record USPN 5,704,017, discloses collaborative filtering system as shown in column 18, lines 42 – 63, but does not disclose an inference system trained by the log selections of previously viewed information and that assigns values to selections in a recommendation list based on the previously viewed information, the inference systems employs collaborative filtering techniques on a temporal history of the previously viewed information to assign values to selections in the recommendation list from higher probability to a lower probability that a user of the system would prefer to view information corresponding to an available selection.

The closest prior art of record USPN 6,714,917, discloses predicated viewing habits of a subscriber which is created based on the demographic data and the viewing

Art Unit: 2162

habits associated with subscribers having that demographic profile as shown in column 6, lines 45 - 55, but does not disclose an inference system trained by the log selections of previously viewed information and that assigns values to selections in a recommendation list based on the previously viewed information, the inference systems employs collaborative filtering techniques on a temporal history of the previously viewed information to assign values to selections in the recommendation list from higher probability to a lower probability that a user of the system would prefer to view information corresponding to an available selection.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fred I. Ehichioya whose telephone number is 571-272-4034. The examiner can normally be reached on M - F 8:00 AM to 4:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E. Breene can be reached on 571-272-4107. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
